DETAILED ACTION

Allowable Subject Matter

1. Claims 1-5, 7-9, and 11-14 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. While U.S. Patent No. 5,247,450 to Clark shows an electronic timing system using a central controller similar to the current invention, neither this reference taken alone or in combination with the prior art of record disclose a central controller integrated with one or more of the glass processing units. It is this integration, in combination with the remaining elements and features of the invention, that the applicant's invention defines over the prior art of record.
4. It is clear from applicant's arguments presented 5/9/2006 that the term "integrated" is intended to mean that the controller is physically a part of the glass forming machine and it is not simply another machine with a data connection to the glass forming machines.
5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
